

Washington students fall behind early and fall out over time.

Notes:

- * Includes students who transfer in after 9th grade and excludes students who transfer out.
 - ** Estimate counts students who do not graduate in five years as dropouts.
 - *** Six years after graduation.
 - **** Seven years after graduation. Student obtaining a postsecondary degree does not equal the number of students starting 9th grade less the students exiting the "leaky pipeline" due to rounding.
